Contents—Volume 27, 1993

Current Microbiology

© Springer-Verlag New York Inc. 1993

Number 1, July 1993

Natural Resistance of the Mycelial Culture of the Mushroom, *Panaeolus papillonaceus*, Towards Growth Inhibition by Polyene Antibiotics
M. Mukherjee, A.K. Chakravarty, and S. Sengupta 1

Regular Proteinaceous Layers of *Thermococcus stetteri* Cell Envelope
Georgy M. Gongadze, Alla S. Kostyukova, Margarita L. Miroshnichenko, Elizaveta A. Bonch-Osmolovskaya 5

Glucoamylases Encoded by Variant *Saccharomycopsis fibuligera* Genes: Structure and Properties
Juraj Gašperik and Eva Hostinová 11

Pulsed-Field Gel Electrophoresis Study of the Genome of *Caldocellum saccharolyticum*
Kim M. Borges and Peter L. Bergquist 15

Genome Analysis of *Propionibacterium freudenreichii* by Pulsed-Field Gel Electrophoresis
Thomas G. Rehberger 21

Analyses of the Gene and Amino Acid Sequence of the *Prevotella* (*Bacteroides*) *ruminicola* 23 Xylanase Reveals Unexpected Homology with Endoglucanases from Other Genera of Bacteria
Terence R. Whitehead 27

Detection and Properties of Curvaticin 13, a Bacteriocin-like Substance Produced by *Lactobacillus curvatus* SB13
I. Sudirman, F. Mathieu, M. Michel, and G. Lefebvre 35

Physiological and Morphological Alterations Induced by Carbaryl and 1-Naphthol Combinations in *Nostoc linckia* Isolated from Soil
Mallavarapu Megharaj, Howard W. Pearson, and Kadiyala Venkateswarlu 41

Chemotaxis Towards Sugars in *Chlamydomonas reinhardtii*
Elena V. Ermilova, Zhanna M. Zalutskaya, and Boris V. Gromov 47

Clostridium perfringens Type A Cytotoxic-Enterotoxin(s) as Triggers for Death in the Sudden Infant Death Syndrome: Development of a Toxico-Infection Hypothesis
James A. Lindsay, Annette S. Mach, Melissa A. Wilkinson, L. Michele Martin, F. Morgan Wallace, Andreas M. Keller, and Lisa M. Wojciechowski 51

Number 2, August 1993

Cloning of a DNA Region of a *Pseudomonas* Plasmid That Codes for Detoxification of the Herbicide Paraquat
Mohd Azib Salleh and John M. Pemberton 63

Effect of Light and Nutrition on Fruiting of *Ascobolus biguttulatus*
Alejandro G. Pardo and Flavia Forchiassin 69

Production and Characteristics of an Intracellular α-Glucosidase from a Color Variant Strain of *Aureobasidium pullulans*
Badal C. Saha and Rodney J. Bothast 73

Electrophoretic Patterns of Esterases and Lactate- and Malate-Dehydrogenases from *Alcaligenes* Species
Chantal Bizet, Bertrand Picard, Fredj Tekaia, and Philippe Goullet 79

Identification and Partial Sequence of the *Bch*A Gene of *Rhodospirillum rubrum*
Inyoul Y. Lee and Mary Lynne Perille Collins 85

Partial Biochemical Characterization of Five *Paracoccidioides brasiliensis* Strains
Júnia S. Hamdan, Maria Aparecida Resende, Antonio L. Cunha, Jr., Claudia H. Alves, and Eduardo O. Cisalpino 91

Identification of the Theta-Type Minimal Replicon of the *Lactococcus lactis* subsp. *lactis* CNRZ270 Lactose Protease Plasmid pUCL22
Jacques Frère, Abdellah Benachour, Madeleine Novel, and Georges Novel 97

Purification and Characterization of Trypsin from an Entomopathogen, *Nomuraea rileyi* NRRL 13755
Subhash C. Gupta, Timothy D. Leathers, Galal N. El-Sayed, and Carlo M. Ignoffo 103

A Study of the Nutritional Requirements of a Selected *Haemophilus ducreyi* Strain by Impedance and Conventional Methods
Michael Dziuba, Peter A. Noble, and William L. Albritton 109

A Simple Mini-Method to Extract DNA Directly from Soil for Use with Polymerase Chain Reaction Amplification
L. Arlene Porteous and John L. Armstrong 115

Characterization of Urease from the Phototrophic Bacterium *Rhodobacter capsulatus* E1F1
María del Mar Dobao, Francisco Castillo, and Manuel Pineda 119

Number 3, September 1993

Temperature-Sensitive Mutants of *Staphylococcus aureus*: Isolation and Preliminary Characterization
Daniel O. Sordelli, Mercedes F. Iglesias, M. Cristina Cerquetti, Mariana Catalano, and Anne Morris Hooke 125

Acidiphilium aminolytica sp. nov.: An Acidophilic Chemoorganotrophic Bacterium Isolated from Acidic Mineral Environment
Noriaki Kishimoto, Yoshimasa Kosako, and Tatsuo Tano 131

Culture and Serological Detection of the Xylem-Limited Bacterium Causing Citrus Variegated Chlorosis and Its Identification as a Strain of *Xylella fastidiosa*
Chung J. Chang, Monique Garnier, Leyla Zreik, Victoria Rossetti, and Joseph M. Bové 137

Localization of the Azoreductase of *Clostridium perfringens* by Immuno-Electron Microscopy
Fatemeh Rafii and Carl E. Cerniglia 143

Amplification and Sequencing of Variable Regions in Bacterial 23S Ribosomal RNA Genes with Conserved Primer Sequences
Guy Van Camp, Sabine Chapelle, and Rupert De Wachter 147

Low Temperature Protocol for Efficient Transformation of *Mycobacterium smegmatis* Spheroplasts
Saleh A. Naser, Charlotte M. McCarthy, Gary B. Smith, and Alan K. Tupponce 153

Relations Enzymes in *Aspergillus repens* Grown Under Sodium Chloride Stress
Uddhav P. Kelavkar and H.S. Chhatpar 157

Lytic Bacteriophages of *Streptococcus mutans*
Allan L. Delisle and Christine A. Rostkowski 163

The Identification and Classification of *Acinetobacter* Strains Exhibiting Variations in Phosphate Accumulation by SDS-PAGE and Numerical Analysis
Marlene Bosch and Thomas E. Cloete 169

Degradation of Homophthalic Acid by *Aspergillus niger*
Chandrakant S. Karigar, Shobha H. Ganji, and Basayya G. Pujar 177

Activity and Species Composition of Aerobic Methanotrophic Communities in Tundra Soils
M.S. Vecherskaya, V.F. Galchenko, E.N. Sokolova, and V.A. Samarkin 181

Number 4, October 1993

Formation of Mineral Phosphate Microtubes in the Presence of Halophilic Cyanobacterium *Microcoleus chthonoplastes*
I.V. Goncharova, L.M. Gerasimenko, G.A. Zavarzin, and G.T. Ushatinskaya 187

Xylitol Production from Xylose by Two Yeast Strains: Sugar Tolerance
V. Nolleau, L. Preziosi-Belloy, J.P. Delgenes, and J.M. Navarro 191

Some Observations on Cyclodextrin-Mediated Boosting of Secreted Amylolytic Enzymes by *Lactobacillus amylovorus*
Anthony Burgess-Cassler 199

Interaction of α_2-Macroglobulin with Alkaline Proteinase from an Alkalophilic *Bacillus* sp. Grown in an Extraordinarily Alkaline Environment
Youhei Yamagata and Eiji Ichishima 205

Cotransformation of Lactococcin-Producing, 2.0-Mega Dalton and Erythromycin-Resistant pGB 301 Plasmids to *Lactococcus lactis* subsp. *lactis* Protoplast
R.K. Gupta, Sunita Grover, and V.K. Batish 211

Biodesulfurization of Organic-Sulfur Compounds
Ralph F. Purdy, Joe S. Lepo, and Bailey Ward 219

Postprandial Variations in the Activity of Polysaccharide-Degrading Enzymes of Fluid- and Particle-Associated Ruminal Microbial Populations
Cécile Martin, Brigitte Michalet-Doreau, Gérard Fonty, and Alan Williams 223

Purification of Grapevine Flavescence dorée MLO (Mycoplasma-Like Organism) by Immunoaffinity
Abdessamad Seddas, Raymonde Meignoz, Xavier Daire, Elisabeth Boudon-Padieu, and Antoine Caudwell 229

Phospholipid Fatty Acid Ester Composition of *Pasteurella multocida* and *Actinobacillus lignieresii*
Cynthia A. Fuller, Paul J. Brignac, and Franklin R. Champlin 237

Legionella pneumophila Virulence Conserved after Multiple Single-Colony Passage on Agar
Yoshimasa Yamamoto, Thomas W. Klein, and Herman Friedman 241

Number 5, November 1993

Circadian Rhythm Mutants of the Prokaryotic *Synechococcus* RF-1
Tan-Chi Huang, Sheng-Tsann Wang, and Nathanaël Grobbelaar 249

Psychrophilic Methanotroph from Tundra Soil
Marina V. Omelchenko, Leana V. Vasilyeva, and G.A. Zavarzin 255

Methanogens in the Human Intestinal Tract and Oral Cavity
T. Brusa, E. Canzi, L. Allievi, E. Del Puppo, and A. Ferrari 261

Partial Characterization of an *rpoD*-Like Gene of *Lactococcus lactis* subsp. *lactis* ML3 with a Polymerase Chain Reaction-Based Approach
Xavier Gansel, Marie Dutreix, Axel Hartke, Philippe Boutibonnes, and Yanick Auffray 267

Control of a Locus That Is Required for Growth of *Anabaena* PCC7120 at Low Temperature
Jean-Michel Panoff 273

Distribution of Bacteriochlorophyll *a* in Species of the Genus *Acidiphilium*
Norio Wakao, Tsuneo Shiba, Akira Hiraishi, Masashi Ito, and Yonekichi Sakurai 277

The Carboyhydrate Moiety of the Acid Carboxypeptidase from *Aspergillus saitoi*
Yasunori Chiba, Youhei Yamagata, Shigeyuki Iijima, Tasuku Nakajima, and Eiji Ichishima 281

Extraction and Preliminary Characterization of a Mycobacteriolytic Preparation (Stazyme) from a *Staphylococcus* Strain: Mycobactericidal Activity and Its Use in Rapid Extraction of Mycobacterial DNA
Sabine Clavel-Sérès, Mohamed Houssaini-Iraqui, and Nalin Rastogi 289

Mechanism of Bactericidal Action of Phenethyl Alcohol in *Escherichia coli*
J.J. Lucchini, N. Bonnaveiro, A. Cremieux, and F. Le Goffic 295

Ammonia Assimilation Enzymes in a Thermophilic *Bacillus* sp. of Marine Origin
Ellen M. Kellner and Harold J. Schreier 301

In Vivo Morphogenesis and Growth Characteristics of Phages CM (*Myoviridae*) Virulent for *Rhizobium meliloti*
Claude Defives, Michel Werquin, Jean-Pierre Hornez, and Jean-Claude Derieux 307

Number 6, December 1993

Collagen Binding to *Escherichia coli* Strain NG7C
W. Shen and Å. Ljungh 311

Characterization of *car α*, *car Lep*, and *Crt I* Genes Controlling the Biosynthesis of Carotenes in *Mycobacterium aurum*
Mohamed Houssaini-Iraqui, Hugo L. David, Sabine Clavel-Sérès, Farida Hilali, and Nalin Rastogi 317

Transfer and Replication of RSF1010-Derived Plasmids in Several Cyanobacteria of the Genera *Synechocystis* and *Synechococcus*
Pierre Mermet-Bouvier, Corinne Cassier-Chauvat, Pierre Marraccini, and Franck Chauvat 323

Potential Pathogenic Factors Produced by a Clinical Nontoxigenic *Vibrio cholerae* O1
Munshi Moyenuddin, Kaye Wachsmuth, John E. Houghton, and Donald G. Ahearn 329

Carbohydrate Update Genes in *Escherichia coli* Are Induced by Carbon Starvation
Denise M. Alexander, Keith Damerau, and Ann C. St. John 335

Toxicity of the Extracellular Products of *Vibrio damsela* Isolated from Diseased Fish
Belén Fouz, Juan L. Barja, Carmen Amaro, Carmen Rivas, and Alicia E. Toranzo 341

Elemental Sulfur Production During Mixotrophic Growth on Hydrogen and Thiosulfate of Thermophilic Hydrogen-Oxidizing Bacteria
Trello Beffa, Margaret Berzcy, and Michel Aragno 349

Isolation, Characterization, and Transmission of Human T-Lymphotrophic Virus Types I and II in Culture
Katsuhiko Kitamura, Donna L. Rudolph, Cynthia Goldsmith, Thomas M. Folks, and Renu B. Lal 355
